OBJECTIVE

To obtain a role as a Backend Web Developer, where I can utilize my mastery of Python and Django to create high-quality web applications. With my knowledge of computer science and strong passion for programming, I am eager to collaborate with a team of experts to build innovative solutions for the web. I am confident that my technical expertise and meticulous attention to detail, as evidenced by my noteworthy project NoteD on GitHub, will allow me to make valuable contributions to your organization. I am committed to becoming a middle developer as quickly as possible.

EDUCATION

Graduated: 2020

Saint-Petersburg

Bachelor's Degree in Computer Science

St. Petersburg State Transport University

- *Relevant courses:* Object-oriented programming, Networks, Databases, Human-machine interaction
- *Publication:* About Determining A Function Name By Abstract Syntactic Tree Using Neural Network

PROJECTS

NoteD @ Publishing platform

Link: <https://github.com/noted/welel>

Tech Stack: Python, Django, PostgreSQL, Bootstrap, Redis, Celery, Nginx, Unicorn, Docker

- Wrote a technical specification document for the project.
- Developed a website that helps to create personal notes, share them public, search for notes on a specific information source or interesting topics and save them, follow users and be followed by others.
- Collaborated with a DevOps specialist to deploy the project on the internet and establish a CI/CD pipeline.
- Added project metrics and implemented SEO schema tags to enhance search engine optimization.

Airsoft Shop @ E-commerce

Link: <https://github.com/welel/airsoft-shop-website>

Tech Stack: Python, Django, PostgreSQL, HTML/CSS, Bootstrap

- Developed a website (frontend/backend) for selling products.

Question & Answer website

Link: <https://github.com/welel/ask-website>

Tech Stack: Python, Django, SQLite, HTML/CSS

- Developed a website for asking and answering questions.
- Deployed the project on PythonAnywhere.

TECH SKILLS
